

Should our team travel to our planned training camp or sporting event overseas?

Benefits

- Why is the team travelling?
- What is the specific aim of the training camp or competition?
- Is the travel optional, important or necessary to achieve the overall objectives?
- Are there any suitable lower risk locations or events available that can provide the same or similar benefit?
- What is lost by not travelling to the intended 'elevated-risk' location?

Risks

- How many people are in the travelling party and how long will the team be together?
- Are there any medically high risk people in the Party (> 65 yrs old, co-morbid medical issues?)
- Are all preventive vaccines in order?
- What is the travel route, will you be in any high risk areas en route?
- What are the current known risks and travel recommendations for the location you are going to?
- What are the current known risks and travel recommendations for adjacent locations in the region you are going to?
- How close are accommodation / sleeping quarters? Is overcrowding and hygiene an issue?
- Are there teams attending from high risk regions?
- What has been the recent rate of change for these locations?
- What are the key destinations and events for your team in the foreseeable future?
- Would the presence in an 'elevated-risk' location make travel to other locations more difficult, secondary to mandatory quarantine periods?
- Are there likely to be updates to the current travel recommendations?
- How well is the destination medical system coping?
- Will you have a doctor travelling with your team?
- Do you have an emergency medical plan in place?
- What is the plan for emergency repatriation or evacuation?
- Do you have local medical contacts in place?
